Scrums are 1 week increments. Planning is complete at end of minutes.  
Code, Test, and Document this Scrum.

What will be completed in the next Scrum:

Everyone -

- Finish DEPTH of your tests - Cindy and Leah will help
- Work with Cindy and Leah to get all your code files updated with phpdoc strings
- Cindy:
  1. Work with members so all files have phpdoc string - see controllers/admin.php
  2. Finish Red/Green Light test stubs for all tests cases - there should be a lot of red lights at the end of this week
  3. Leah shares these tasks
- Chaylo:
  1. Sick last week, finish last week requirements
  2. Tim will help start more features
- Zeke:

1. Not present, please contact us for new requirements. Generally: look into existing systems we can link with gus so members can use a forum until the custom one is complete. Existing forums are phpbb, for example.
- Abhay:
    1. Finish integration of pm MVC's, start helping Alex with doc/upload meta data server
  - Alex:
    1. start/finish file editing controller functions
    2. start meta data server that does some interfacing with sessions. Meta data server will have user-file db lookout table, to be completed by end of week
  - Scott:
    1. finish test model for auto test logging. Correct Firefox CSS errors
  - Brett:
    1. Finish user/group-page functionality. Get with Scott for implementing layouts
  - Leah:
    1. assist Cindy
  - Tim:
    1. assist with forum controller
  - Colby:
    1. finish group-user lookout table w/ permissions.
    2. Help Alex with his file-user lookup table.
    3. Try linking a phpbb distro with out user db
    4. Same with a wikimedia distro
    5. Try opening up server (??) for team to dev on.
